Libra Partnership Carbon Reduction Plan

Supplier name: Libra Partnership
Publication date: September 2026

Commitment to achieving Net Zero

Libra Partnership is committed to achieving **Net Zero greenhouse gas emissions by 2050**.

Baseline Emissions Footprint

Baseline reporting period: 1 July 2025 – 30 June 2026

This is Libra Partnership's first Carbon Reduction Plan and this reporting period has therefore been adopted as our baseline. Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions.
Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline emissions

Emissions	Total tCO2e
Scope 1	**0.00**
Scope 2	**0.12**
Scope 3 – Upstream transportation and distribution	**0.03**
Scope 3 – Waste generated in operations	**13.05**
Scope 3 – Business travel	**0.98**
Scope 3 – Employee commuting	**8.47**
Scope 3 – Downstream transportation and distribution	**12.96**
Total emissions	**35.61 tCO2e**

Current Emissions Reporting

As this is Libra Partnership's first Carbon Reduction Plan, the current reporting period is also our baseline reporting period.

Total quantified organisational emissions: 35.61 tCO2e.

Emissions Reduction Targets

Libra Partnership is committed to achieving **Net Zero emissions by 2050**.

As an initial interim target, we aim to reduce our quantified organisational emissions by **at least 10% by June 2031**, reducing emissions from the baseline of 35.61 tCO2e to approximately **32.05 tCO2e or below**.

Our emissions baseline and reduction targets will be reviewed annually and refined as the quality and availability of organisational emissions data improves.

Carbon Reduction Measures

Libra Partnership has already adopted a number of working practices that reduce its environmental impact, including:

- predominantly hybrid working;
- use of virtual meetings where appropriate to reduce unnecessary travel;
- encouraging the use of public transport where practical;
- digital and paperless case-management systems;
- recycling through our serviced-office facilities;

Over future reporting periods, we will:

- seek opportunities to reduce avoidable car journeys;
- limit unnecessary printing and production of physical materials.
- increase the use of rail and public transport where operationally practical;
- review opportunities to reduce avoidable air travel;
- further reduce printing and physical promotional materials;
- consider energy efficiency and environmental impact when replacing IT equipment;
- consider environmental impact within purchasing and supplier decisions.

Progress against our baseline and carbon-reduction target will be reviewed annually.

Declaration and Sign-off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.
Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard[13] and uses the appropriate government emission conversion factors for greenhouse gas company reporting.[14]
Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements (where required), and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.[15]
This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
